

HRF009

ESS Report Viewer

You would like to provide your employees with various evaluations on demand within the framework of the existing employee self-service (ESS) scenarios. Until now, this was only possible limited and with high expense.

Solution Description

With HRFORCE ESS Report Viewer for the Internet you can provide your employees with existing evaluations (payslips, time sheets, annual payslips ...) as a PDF within your ESS scenario without programming.

The solution is based on the evaluations already existing in the SAP ERP system and offers a simple Web interface based on WebDynpro for ABAP for the employee.

Existing ESS scenarios can therefore be expanded very easily with further information.

Implemented Functionalities

DISPLAY OF REPORTS

Existing reports can be made available to the employee as a PDF by customising. The employee therefore receives a standardised, read-only document.

SELECTION

The employee gets to request specific data (year selection, period selection, free date selection) with simple selection templates.

E-MAIL FUNCTION

The employee can send the generated document (e.g.: salary slip) simply to the e-mail inbox with the integrated e-mail function.

Client Advantages

One-time cost expenditure and usage for multitude of reports

Integration of customer evaluations

Can be used without SAP Portal

Stable, proven Web technology

Implementation by customising possible

No programming knowledge (ABAP, WebDynpro for ABAP) required

Simple adaptation options via expansion points

Integration option of customer-specific selection templates

Can also be used without implemented enhancement packages

Can also be used with new ESS On-Behalf scenarios (from EhP 5)
