Accenture OrgPublisher™ for SAP Solutions

Modern companies are subject to continuous changes in their organisational structure that require continuous and time-consuming updating of complex reporting structures.

Solution Description

OrgPublisher™ for SAP solutions is an efficient and easy-to-use web-based solution for professionally creating organisation charts directly from the SAP ERP HCM system.

OrgPublisher™ for SAP solutions enables you to provide your employees automatically with your most up-to-date organisation charts over the Intranet and supply them with the data that they require for communicating better and working more efficiently - all at the touch of a button.

Implemented Functionalities

DIAGRAMS AND VIEWS
Various views and a wide range of layout options from one data source

AUTOMATIC PUBLISHING
Organisation charts can be published directly on the Intranet automatically or manually.

EXTRACTING OF DATA FROM SAP ERP HCM
Organisation Management and personnel master data are selected via an SAP interface.

SIMPLE DATA SELECTION FROM SAP ERP HCM
Settings of the interface using wizards, no maintenance of the customising tables, and no programming knowledge

WEB-BASED EMPLOYEE LIST
Employee data can also be displayed in the form of a telephone list and search functions.

Client Advantages

Reporting structures can be built quickly and easily thanks to ready-made formats.

Via additional data sources (e.g.: Excel) diagrams can be enhanced with non-SAP data.

Employee access to current released reporting structures or simple data analysis over the Intranet at any time

Web-based "What if" planning for managers (OrgPlan) for decentralised organisational planning

Structure diagrams can be made available for further use via Web browser, in MS PowerPoint or as MS Excel files.

Links to more information, such as position description, documents, websites, etc., can be integrated into reporting structures.
