Ingentis org.manager

Visualise your organisational structure and HR data fully automated and in a customised way. Perform reorganisations and org design activities via drag-and-drop.

Solution Description

Ingentis org.manager offers numerous valuable features for the automated creation of organisational charts, efficient organisational design and easy HR controlling. Individually determine the content and design of your data visualisations. Whether in the form of a classical hierarchy chart, in a dashboard or with the help of Big Data graphics – with Ingentis org.manager you always maintain the overview. In addition, the software provides the possibility to simulate reorganisations and create various what-if scenarios.

The add-on for access protection ensures that particularly sensitive data can only be viewed by authorised employees.

Ingentis org.manager is used by numerous well-known companies worldwide. The solution can be directly connected to leading HR systems such as SAP, Oracle, PeopleSoft, or Workday. Via freely scalable interfaces (ODBC, CSV, LDAP), it can be linked to any data source that has a hierarchical structure.

Implemented Functionalities

ORG CHART AND POSITION STRUCTURE

Display of the workforce and organisational structure
