## EPI-USE GDPR Compliance Suite

Most recently, much attention has been paid to GDPR. You are looking for a respective solution to tackle compliance with GDPR and other data privacy legislation in your SAP system? You will need the GDPR Compliance Suite with the corresponding products Data Disclose, Data Redact and Data Retain.

### Solution Description

Since May 25th, 2018, all organisations world-wide collecting, storing and processing personal data from European Union (EU) citizens must be able to reveal the data they have on the individual and what purpose(s) it is being stored and used for.

The GDPR Compliance Suite helps you to reach compliance. You can alienate or delete sensitive or identifying data without removing the whole record. In addition, EPI-USE Labs provides the comprehensive solution Data Secure to protect data with predefined masking rules.

Data Disclose, Data Redact and Data Retain are built on a solid foundation of existing technology and Intellectual Property of EPI-USE experts.

### Implemented Functionalities

#### DATA DISCLOSE

Quickly find and view the data subject's footprint; connect as many non-SAP system as you wish; view and customise the output

#### DATA RETAIN

Proactively finds data subjects for redaction based on flexible rules

#### DATA REDACT

Sensitive or identifying fields are altered, or cleared, without removing the whole record

#### DATA SECURE

Protect sensitive data in all non-productive systems with predefined masking rules

### Client Advantages

Searches all ABAP stack systems (ERP, CRM, SRM, BW etc.) including non-SAP system integrated with the product's APIs in an automated process

Display an ongoing commitment to compliance and leverage retention periods for different data types

Reporting of non-sensitive data is unaffected, e.g. graphical or gender statistics

Proactive deletion of old data; costly archiving projects or custom deletion solutions can be avoided
